## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-2 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Backstrom et al. [5,050,807], hereinafter Backstrom in view of Burda [4,793,561].

Backstrom discloses in Fig 1, a crushing control apparatus including a first cutter element set for cutting wooden material upon rotation of a rotating element in a first direction and a second cutter element set for cutting peat upon rotation of a rotating element in a second direction.

Backstrom does not disclose a memory means, a hydraulic motor and a control means for setting a rotation speed of the shafts in accordance with a read out control

Art Unit: 3725

condition. It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate a memory means, a control means into the device of Backstrom in order to improve the productivity of the device and since it has been held that broadly providing a mechanical or automatic means to replace manual activity which has accomplished the same result involves only routine skill in the art. *In re Venner*, 120 USPQ 192.

The crushing control apparatus of Backstrom is inherently capable of crushing the straw matting. Additionally the use of hydraulic motor is well known in the art.

Burda teaches that providing a control means for setting a rotation speed of the shafts in accordance with a read out control condition [jamming] in a crushing device is conventional [see the abstract and col 3 lines 34-45 for example]. It would have been obvious, in view of Burda to further provide modified device of Backstrom with the specific control system as recited in claim 1 in order to prevent jamming of the shredder.

***Allowable Subject Matter***

4. Claims 3-6 are allowed.

***Response to Arguments***

5. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3725

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
